

Whereas,

- The human, economic and environmental rights of peasant and small-farmer communities around the world are especially vulnerable to violation; and
- Canada encourages but does not require companies to prevent human rights abuse and environmental damage in their global operations and supply chains around the world,

We, the undersigned citizens and residents of Canada, call upon the House of Commons to adopt human rights and environmental due diligence legislation that would:

- require companies to **prevent, report and remedy all violations of human and environmental rights** throughout their global operations and supply chains; and
- establish a legal right for people who have been harmed to **seek justice in Canadian courts.**
